# MODERATE BALANCED FUND

## FUND OBJECTIVE

Seeks to provide investors with a total return consistent with a broadly diversified portfolio of high quality fixed income securities and common stocks, with varying equity allocations in accordance with the desired risk/return tradeoff.

## INVESTMENT STRATEGY

The Fund consists of units from the Fixed Income Fund and Total Equity Fund. The traditional balanced fund allocation (60% equity, 40% fixed income) provides global equity exposure – domestic large-cap and small-cap, and international – for greater capital appreciation, while bonds temper volatility and provide a stream of income. The Fund employs shareholder engagement and social and environmental screens.
