**FUND OBJECTIVE**
Seeks to provide investors with a total return consistent with a globally diversified equity and fixed income portfolio free of investments in companies that explore for or produce fossil fuels.

**INVESTMENT STRATEGY**
The enhanced global equity index portfolio invests in a broad array of U.S. common stocks, international developed markets and emerging market countries. Both the fixed income and equity components of the Fund avoid investments in companies with the greatest amount of fossil fuel reserves – those that produce or explore for oil, gas or coal. The Fund employs shareholder engagement and social and environmental screens.
